Experienced in legacy systems, greenfield projects, and production deployments contributing to business-critical applications.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, TypeScript, Redux, React Query, React Hook Form

Backend: Node.js, Express.js, REST APIs, MongoDB, SQL, Supabase, Sequelize

Cloud & Tools: AWS S3, Git, GitHub, Jira, Agile/Scrum, Postman, Supertest, Chai, Sentry

PROFESSIONAL EXPERIENCE

Radium Rocket — Fullstack Developer (Sep 2021 – Jan 2026)

Qira Global / Qira Pagos (Agritech E-commerce & Payments) – 2 years

- Developed fullstack features for web (React + TypeScript) and mobile (React Native).
- Designed and implemented REST APIs and CRUD modules using Node.js and Express.
- Integrated ERP system (Rojosoft) for stock and transaction synchronization.
- Participated in major Node.js migration updating deprecated libraries.
- Contributed to maintenance and bug reduction in legacy systems handling 50–100 daily transactions.

Aapresid – Red de Innovadores (Digital Media Platform) – 1 year

- Contributed from planning to production deployment in a greenfield project.
- Developed public platform (Next.js) and Backoffice system (React).
- Designed dynamic content editor (core business feature).
- Participated in technical decisions, spike documentation, and PR reviews.
- Integrated AWS S3 for media storage and deployment configuration.

M23 – Virtual Checkbook (Fintech) – 1 year

- Built fullstack features using React, Node.js, SQL, and Supabase.
- Created backend endpoints, database schemas, and validations.
- Implemented multi-step dynamic form for check processing.
- Supported production stabilization and bug resolution.

ADDITIONAL PROJECTS

- VR Backoffice system for headset session management.
- Internal enterprise admin tool for employee and project allocation.
- Maintenance and client collaboration on algorithm-based trading platform.

EDUCATION

Technical Degree in Video Game Development
Universidad Abierta Interamericana (2019–2022)
